SUMMARY

I have 2 years of experience as a QA Tester, where I highlight my skills in adaptation, communication, cooperation, and teamwork. I am motivated to learn new tools and enhance error detection and workflow affecting websites or apps.

PROFESSIONAL EXPERIENCE

Aug 2022 - QA Tester

Present Hazak Tech

- Focused on maintaining website performance improvement.
- I created test cases to evaluate different scenarios with new features implemented in the Baketivity project.
- Conducted various types of purchases using payment methods such as Amazon Pay, Amazon Prime, PayPal, and Stripe.
- Implemented the ADA Compliance tool to enhance website accessibility, statistics, and productivity.
- Implemented the use of Selenium IDE for executing tests during E2E and Regression Testing.
- Contributed to the Reverie Social project that's also related to a Woocommerce service and ceremony execution, conducting tests on purchases, functionality, and visuals on Desktop and devices like Android and iPhone.
- Additionally, I was involved in five other projects where I performed functional and visual QA tests, creating spreadsheets for each project and uploading evidence of detected bugs to help developers understand the issues.
- I estimate the time it will take to perform QA on tasks in each sprint.
- I started a course on learning test automation with Postman that is still in progress so I can incorporate it to the projects and make efficient test scenarios.

Oct 2021 - QA Trainee / QA Junior

Jul 2022 PSh

- Conducted regression tests and reported errors to the DEV team.
- Worked on updating libraries for the Nearpod Marketing project. Learned the basics of testing and Agile concepts.
- Tested functional and visual defects on desktop using browsers like Chrome and Safari; tablet (iPad) and mobile (iPhone and Android).
- Used the Performance Test tool to monitor websites and improve statistics.
- Participated in an NFT project where I used Metamask, a crypto wallet, to test purchases with NFT contracts.
- Implemented the ADA Compliance tool to enhance site accessibility for users with disabilities.
- Documented testing processes and tool functionality.
